We’re a team of nearly 40 passionate, talented, dedicated folks who love working together and with our clients to plan, design, build, and launch web & mobile products that transform businesses and industries.

When brothers Brian Williams and Andy Rankin joined their dad to establish Viget Labs in 1999, the Internet was changing everything, and we were determined to lead that change.

Innovation is the norm; quality is valued over growth; clients are respected (and are expected to reciprocate); integrity and authenticity are required; hard work and commitment is rewarded; measurable results matter most; and staffers feel like family (and they actually love coming to work).

So, they did.

After nearly a decade of success, we’re pumped to be continuing our organic growth in our Falls Church, VA, headquarters, and Durham, NC, office.

## SCHOOL OF ART AND DESIGN

The School of Art and Design is more than just an exceptional art and design school. Because it is a professional school within a major university, our students share in an environment that offers a wealth of academic resources and endless opportunities and activities.

As an undergraduate student in the School of Art and Design, you will be actively involved in mastering your chosen studio discipline and will receive a liberal education that we believe is integral to your development as an artist or designer. We strongly stress creativity, imagination, and experimental approaches to your art, as well as the importance of drawing. Faculty, visiting artists, and students will provide you with constructive feedback on your work. We offer:

- Sixteen art and design majors to choose from
- Curricula that allow for academic electives chosen from any area of the University
- Excellent facilities
- Dedicated faculty who are active artists and designers in their respective fields and a strong visiting artists program
- Opportunities for internships as well as study abroad experiences in Florence, Italy, and London, England
- A 100-plus-year tradition of excellence

If you are passionate about art and design and committed to exploring your creative voice, the School

Obsolescence

Did you just buy a computer, only to have them introduce a far more powerful model within months – someone else sell it for a lower price?

Better... ever have it not happen?

It's a two-edged sword that way

No, it's not an attempt to promote piracy. It's the nature of the industry.

Moore's Law (comparing the capacity of integrated circuits) will double every two years. It's not a perfect predictor of change – sometimes things move a bit faster, sometimes slower.

What? So this is really making waves. Microsoft announces an HTML extension which will enable a new standards layout mode in IE8. Oh, you can also do it at the server side since it’s an http-equivalent meta tag.

A new layout mode, huh? That was my initial reaction. “Huh”. I don’t know what that means. And I think anyone who claims to know immediately is full of it. I rant and rave about the new questions this raises.

Sometimes our data on the internet feels like a jumble of loosely related connections & strands.

With FeedStitch, now it’s super easy to grab all your related feeds and give them a common purpose.

Use your new feed anywhere. Go ahead, reclaim your data.

The Ten Latest Stitches

- FunkyFranzie just stitched together twelve feeds to create 80's Hair Bands.
- JohnnyFresh just stitched together 60 feeds to create Hangover Helpers.
- 2toneBlimp just stitched together sixteen feeds to create Flight of the Sardine.

Take many data feeds and make them one.

It's easy, for real. FeedStitch give you the power to pull data feeds from all over the web & then stitch them together into a single feed of awesome power & limitless possibilities.
